

Hongxun Hui

Ph.D. Candidate
Smart Grid Operation and Optimization Laboratory
College of Electrical Engineering
Zhejiang University

No.38 Zheda Road, Hangzhou, Zhejiang, China
Tel: +86-18143465355; +1-202-460-4566
E-mail: huihongxun@zju.edu.cn; hongxunhui@vt.edu.cn
Personal website: <https://huihongxun.github.io>

EDUCATION

Virginia Tech

Visiting Scholar, Advanced Research Institute.

Arlington, USA

10/2018 – 10/2019

- Academic adviser: Prof. Saifur Rahman (Joseph R. Loring Professor of Electrical and Computer Engineering, and Director of Advanced Research Institute, National Capital Region)
- Expertise: Control and dynamic performance analysis of the power system with the control loop of flexible loads; Coupon-based demand response for consumers facing the flat-rate retail pricing electricity market.

The University of Tennessee

Short-term Exchange, CURENT Engineering Research Center

Knoxville, USA

06/2019 – 07/2019

- Academic adviser: Prof. Fangxing Li (James W. McConnell Professor in the Department of Electrical Engineering and Computer Science)
- Expertise: 5G network-based internet of things for demand response in smart grid.

Zhejiang University

Ph.D., College of Electrical Engineering.

Hangzhou, China

09/2015 – 06/2020

- Academic adviser: Prof. Yi Ding (Elected in the *National Thousand Young Talents Program*) & Prof. Yonghua Song (*Fellowship of the Royal Academy of Engineering*)
- Expertise: Modern Control Theory, Operation Analysis of Power System, Power Market, Demand Response.
- Award: The First Batch of the Academic Rising Star Program in Zhejiang University, Tang Lixin Scholarship

Zhejiang University

B.S., College of Electrical Engineering. GPA: 3.92/4.0 (top 3%)

Hangzhou, China

09/2011 – 06/2015

- Expertise: Advanced Mathematics, Probability Theory, Control Theory, Electrical Machinery, Programming in C.
- Award: Outstanding Graduates of Zhejiang University, Meritorious Winner in ICM

Duke Kunshan University

Academic Program

Kunshan, China

08/2014 – 12/2014

- Courses in English by Professors from Duke University, including the core course on Academic Writing.

RESEARCH INTERESTS

- **Demand response:** modeling and control of flexible loads, capacity evaluation, operating reserve, frequency regulation, peak-shaving services, access abilities of renewable energies.
- **Electricity market:** business model and market framework of demand response, electricity price policy, incentive mechanism, transaction method, settlement method, economy evaluation.
- **Uncertainty analysis:** reliability model and multiple uncertainties of flexible loads, reliability evaluation method, multi-time scale dispatch model of wind power and flexible resources.

SELECTED PUBLICATIONS

Books

1. Yi Ding, Yonghua Song, **Hongxun Hui** and Changzheng Shao. Integration of Air Conditioning and Heating into Modern Power Systems. Springer; 2019. (All eight chapters)

Published Journal Papers

1. **Hongxun Hui**, Yi Ding, Zhenzhi Lin, Pierluigi Siano and Yonghua Song, "Capacity Allocation and Optimal Control of Inverter Air Conditioners Considering Area Control Error in Multi-area Power Systems," *IEEE Transactions on Power Systems*, Early Access, Jun. 2019.
2. **Hongxun Hui**, Yi Ding, Yonghua Song and Saifur Rahman, "Modeling and Control of Flexible Loads for Frequency Regulation Services Considering Compensation of Communication Latency and Detection Error," *Applied Energy*, vol. 250, pp. 161-74, Sep. 2019.
3. **Hongxun Hui**, Yi Ding and Menglian Zheng, "Equivalent Modeling of Inverter Air Conditioners for Providing Frequency Regulation Service", *IEEE Transactions on Industrial Electronics*, vol. 66, no. 2, pp. 1413-23, Feb. 2019.

4. **Hongxun Hui**, Yi Ding, Weidong Liu, You Lin and Yonghua Song, "Operating Reserve Evaluation of Aggregated Air Conditioners", *Applied Energy*, vol. 196, pp. 218-228, Jun. 2017.

SELECTED PATENTS

1. Yonghua Song, **Hongxun Hui**, Yi Ding, et al. “A Calculation Method of Aggregated Air Conditioners for Providing Regulation Services for Power Systems,” No. CN201610821647.X, Dec. 2018. (Issued Patent)
2. Yi Ding, **Hongxun Hui**, Yonghua Song, “An Intelligent Meter with Multi-time Scale Electricity Prices,” No. CN201610543375.1, Oct. 2016. (Issued Patent)
3. Yonghua Song, **Hongxun Hui**, Yi Ding, “A Smart Home System Based on the Real-time Electricity Prices,” No. CN201610540869.4, Oct. 2016. (Substantive Examination)
4. **Hongxun Hui**, Yibai Lu, Lequan Yu, Litong Lv, Hui Sun, “An Electrocardiogram Detection Device Based on Bluetooth Communication,” No. CN201410094326.5, Mar. 2016. (Issued Patent)
5. **Hongxun Hui**, Chuangxin Guo, “A Dismantling Equipment for Electronic Devices Based on SCM,” No. CN201410010721.0, May 2016. (Issued Patent)
6. **Hongxun Hui**, Chuangxin Guo, “A Self-powered Pinch Meter Based on Micro-generator and SCM,” No. CN201410009920.X, Jul. 2016. (Issued Patent)
7. **Hongxun Hui**, Yaohong Li, Yi Ding, Yonghua Song, et al. “A Power Consumption Estimation Method Considering the Uncertainty of Electricity Prices,” No. CN201710501055.4, Oct. 2017. (Substantive Examination)
8. Yi Ding, **Hongxun Hui**, Zhenyu Chen, Yonghua Song, et al. “A Power Consumption Estimation Method Considering the Incentive Mechanism,” No. CN201710502069.8, Nov. 2017. (Substantive Examination)

RESEARCH EXPERIENCES

Modeling and Potential Analysis of Flexible Loads

Nanjing, China
09/2015 – 06/2016

Supported by China Electric Power Research Institute (No. DZ71-15-004)

Position: Project director. Supervisor: Prof. Yi Ding

- Mathematical and physical model of typical flexible loads, such as air conditionings, EVs and batteries, are developed by MATLAB.
- The response characteristics, potential and uncertainty with real-time electricity prices are simulated.
- The proposed models and methods have been implemented in Jiangsu Province.

Research and Application of Demand Response

Nanjing, China
03/2016 – 11/2016

Supported by State Grid Jiangsu Electric Power Co., Ltd (No. KH20161699)

Position: Project director. Supervisor: Prof. Yi Ding

- The market mechanism and implementation plan of demand response projects are established for the existing electricity organization structure in China.
- The new spike price policy is implemented. According to the energy efficiency evaluation report in Jiangsu Province, the investments in power plants and transmission lines are postponed around 16.78 billion RMB.

Research on Peak-shaving Capacities and Operation Mechanisms of Flexible Loads

Hangzhou, China
01/2016 – 12/2017

Supported by State Grid Zhejiang Electric Power Co., Ltd (No. 5211JY15001S)

Position: Project director. Supervisor: Prof. Yi Ding

- Peak-shaving capacities of flexible loads are evaluated quantitatively, considering multiple uncertainties.
- The accessible abilities of renewable energies are evaluated considering loads participating in peak-shaving.
- The reliability and economy of the system before and after integrating demand response are evaluated.

Market Mechanism Design for Demand Response

Nanjing, China
07/2016 – 06/2020

Supported by Ministry of Science and Technology of China (No. 2016YFB0901103)

Position: Project director. Supervisor: Prof. Yi Ding

- A business model and a market framework are designed for loads participating in demand response project, including the determination of electricity prices, the transaction method, and the settlement method.
- Around 110,000 customers will be equipped with smart devices and participate in the project, which will be the largest demand response project in China.

Reliability Analysis and Optimization of Smart Grid Considering the Coordinated Operation of Flexible Resources and Wind Power

Hangzhou, China
01/2016 – 12/2019

Supported by National Natural Science Foundation of China (No. 51577167)

Position: Project participant. Supervisor: Prof. Yi Ding

- The basic mechanism causing multiple uncertainties of different types of flexible resources is analyzed.
- The reliability models and evaluation methods for power systems is proposed considering the coupling effects between wind power and flexible resources.

ADDITIONAL INFORMATION

Professional Services

- **Vice President**, IEEE Industry Applications Society Student Branch Chapter in Zhejiang University
- **Journal Reviewer** of *IEEE Transactions on Sustainable Energy* (Since 2019), *Applied Energy* (Since 2018), *Journal of Modern Power Systems and Clean Energy* (Since 2018), *International Journal of Electrical Power & Energy Systems* (Since 2017), *IEEE Transactions on Industrial Electronics* (Since 2017)
- **Conference Reviewer** of *IEEE PES General Meeting*, *International Conference on Applied Energy*, *IEEE Sustainable Power & Energy Conference*, *International Conference on Smart Energy Systems and Technologies*, *IEEE International Conference on Environment and Electrical Engineering* and *IEEE Industrial and Commercial Power Systems Europe*.

Teaching

- Teaching Assistant, *Power System Operation and Control* (Instructor: Prof. Yi Ding and Prof. Pierluigi Siano), College of Electrical Engineering, Zhejiang University, 2016.

Community Contribution

- A Volunteer in Affiliated Hospital of Zhejiang University School of Medicine
- A Lifetime Member in Future Entrepreneur Club, Zhejiang University
